

Post-Doctoral Research Fellow

Research Area Remote Sensing

Job Title Post-Doctoral Research Fellow

Institute State Key Laboratory of Information Engineering in Surveying, Mapping and Remote Sensing (LIESMARS), Wuhan University

Job Specification LIESMARS is the leading research institute in remote sensing in Wuhan University, while Wuhan University is the highest ranked university in remote sensing worldwide. LIESMARS is part of the International Academy of GeoInformation in Wuhan University and is building international research teams. The working and study language within the International Academy of Geo-Information is English.

The group of Prof. Balz is looking for a talented and highly motivated PostDoc. The successful applicant will develop new research initiatives in the field of SAR and InSAR Remote Sensing.

The candidates main responsibilities will be:

- Conducting and leading research activities
- Training and mentoring students
- Exploring new research directions
- Preparation of publications

Required Qualification PhD in remote sensing, photogrammetry, or other relevant topics, with expertise in SAR remote sensing, ideally in multi-baseline interferometry.

All the candidates are expected:

- To have the ability to conduct research independently
- To have good communications skills working as part of an international team.
- To have the ability to write and communicate in English
- To have at least one (SCI) paper published or about to be published.

Candidates who are going to finish their PhD are strongly encouraged to apply.

Language The working language is English. A very good speaking/writing knowledge is required.

Application Deadline 2022-12-1

To Apply Please send your CV and cover letter to Prof. Dr.-Ing. Timo Balz (balz@whu.edu.cn)
